The most recent version of this document is available electronically at:
1. Introduction

This will be the written program policy manual for the Public Access Defibrillation (PAD) program at Cornell University

2. Objectives

- Provide details of documents and requirements that are mandated by the State of New York
- Identify the process of annual review and update of the program that determines the objectives and targets.

3. Definitions

The following definitions apply to this program:

- (PAD) Public Access Defibrillation
- (EHCP) Emergency Healthcare Provider this person is the Medical Director of the program
- (PAD Manager) The Program Manager has overall responsibility for the program
- (PAD Coordinator) The person/s delegated by the PAD Manager to assist with the day to day operations of the PAD program
- (REMSCO) Regional Emergency Medical Services Council
- (AED) Automatic External Defibrillator
- (EMS) Emergency Medical Services
- (DOH) Department of Health
- (ECC) Emergency Cardiovascular Care

4. Applicability

4.1 Scope & aspects or hazards

This program will apply to all University buildings that have AED units installed and will follow the guidelines per DOH Policy Statement 07-04

4.2 Requirements

AED’s shall be in compliance with Article 30, section 3000-B (1)(A). The AED must be programmed to the current Emergency Cardiovascular Care guidelines, capable of defibrillating both Adult and Pediatric patients.

Effective July, 2007 per 3000-b of NYS Public Health Law, Section 1 – Subdivision 3 paragraph (f) A sign or notice shall be posted at the main entrance of a facility or building in which the AED is stored or maintained on a regular basis

5. Roles and Responsibilities

5.1 Program Manager

The Program Manager has overall responsibility for the program...including:
• Identifying and communicating legal, regulatory and policy requirements associated with the program
• Establish an Inventory record that includes year, make, model and serial number of the unit
• Establishing a tracking mechanism to ensure units are physically checked on a monthly basis
• Establish a sufficient replacement supply of Adult and Pediatric replacement electrodes and batteries
• Establish a maintenance program per manufacturer recommendations
• Develop and maintain a current written collaborative agreement along with the EHCP making sure the Central New York EMS Council has the latest agreement on file
• Develop written policies and procedures per NYS DOH 07-04 Policy statement

5.2 PAD Program Coordinator
• Identifying and communicating legal, regulatory and policy requirements associated with the program
• Establish an Inventory record that includes year, make, model and serial number of the unit
• Establishing a tracking mechanism to ensure units are physically checked on a monthly basis
• Establish a sufficient replacement supply of Adult and Pediatric replacement electrodes and batteries
• Establish a maintenance program per manufacturer recommendations
• Establish a training schedule, teach CPR/First aid classes, enter data into tracking database

5.3 Emergency Healthcare Provider/Medical Director

Dr. Edward Koppel
Gannett Health Services
607/255-5155
607/351-0991
The EHCP shall review every use of an AED and follow up with appropriate parties as deemed necessary

5.3 Building Coordinator
The Building Coordinator’s responsibilities include:
• Assist in determining acceptable placement within facility
• Assist with placing proper signage at facility

5.4 AED placement and budgetary items

Actions
While communicating with the PAD Coordinator for a particular facility identifies the source of funding for this project with the building coordinator/person responsible for PAD install. Generally they are one of the following:

- SUNY funding for the State building on campus.
- Private or Endowed funding from a particular college or person.
- Environmental Health and Safety will take care of maintenance items such as electrodes, batteries and replacement units on an 8 year replacement schedule. (7 year on Cardiac Science G3 models) This goes for SUNY and Endowed units.

**ENDOWED OR OTHER PRIVATE FUNDING**

- PAD Program Manager or PAD Program Specialist should communicate with the Facility Coordinator or the purchasing agent the cost of the AED, the cost of the cabinet and the cost of cabinet install including fire alarm connection. Cost consideration should include cost of the unit, cabinet, cabinet install and connection of cabinet to the fire alarm system.
- The PAD Program Manager or PAD Program Specialist should communicate the training requirements of the PAD installation per NYSDOH public access training guidelines.
- Verify that the PAD coordinator is still interested in the program and has the funding for the AED Unit.
- The current Standard AED equipment on campus is the Cardiac Science G5 unit. The campus PAD Manager will make a final determination of manufacturer and unit to be purchased.

**STATE SUNY Units**

- The standard AED equipment is the Cardiac Science G5 unit. The campus PAD Manager will make a final determination of manufacturer of the unit to be purchased.

**Installation Guidelines**

Once funding of the program is verified by the PAD Program Manager or PAD Program Specialist the AED install preparations can begin. Meet with the facility coordinator and/or public access coordinator at the building where the AED is to be installed.

Identify locations in the building that are public assembly spaces. (50 people or more)
- Identify locations that are close to common areas including lobbies and places where building occupants and visitors would likely be able to see the PAD on a daily basis.
- Identify existing fire alarm conduit and/or devices. It is preferable to place the PAD as close to existing FA conduit/devices due to the cost of installing new conduit and wire.
6. Training

Who needs this training: All Emergency Services personnel, any EH&S personnel that work special events, CUEMS Volunteers, Athletic Trainers, Coaches. Designated personnel from building/s that have AED units located within. Anyone interested in becoming a trained AED user.

Per the New York State Department of Health the following training programs are acceptable:

American Heart Association
American Red Cross
American Safety & Health Institute
National Safety Council
Emergency Services Institute
Medic First International
REMSCO of NYC, Inc.
EMS Safety Service, Inc.

COURSE TOPICS and SKILLS WILL INCLUDE, BUT NOT BE LIMITED TO:
- Basic CPR skills
- Proper use, maintenance and periodic inspection of the AED
- The importance of CPR, defibrillation, advanced life support, adequate airway care and the campus internal emergency response system.
- How to recognize the warning signs of a heart attack or stroke.
- Overview of the local EMS system, including 9-1-1 access and interaction with EMS.
- Assessment of an unconscious patient to include evaluation of airway, breathing and circulation, to determine if cardiac arrest has occurred and the appropriateness of applying and activation of an AED.
- Information relating to defibrillator safety precautions to enable the individual to administer shocks without jeopardizing the safety of the patient or the authorized individual or other nearby persons to include, but not limited to:
  i. Age and weight restrictions for the use of the AED
  ii. Presence of water or liquid on or around the victim.
  iii. Presence of transdermal medications, implanted pacemakers or automated implanted defibrillators.
- Recognition that an electrical shock has been delivered to the patient and that the defibrillator is no longer charged.
- Rapid, accurate assessment of the patient’s post-shock status to determine if further activation of the AED is necessary.
- Authorized individual’s responsibility for continuation of care, such as the repeated shocks is necessary, and/or accompaniment to the hospital, if indicated, or until arrival of professional medical personnel.

7. Operational Tools

Standard Procedures

7.1.1 AED.1 AED Use Procedure

7.1.2 Monthly AED Inspections

This Job Plan shall detail what checks are required during the monthly inspections

https://sharepoint.rmps.cornell.edu:8445/ehs/HSE%20Documents/Public%20Access%20Defibrillation%20Job%20Plan.docx

7.2 Guidance Documents

The following section describes generalized documents that are used when there has been an AED use as well as Manufacturer Manuals

7.2.1 Device Manual for the Cardiac Science AED

7.3 Forms

7.3.1 AED.1 AED Use Guideline

https://sharepoint.rmps.cornell.edu:8445/ehs/HSE%20Documents/AED_USE_Guideline.docx

7.3.2 Central New York AED Usage Form

7.2.3 AED.2 AED Incident Report Form

https://sharepoint.rmps.cornell.edu:8445/ehs/HSE%20Documents/AED%20Incident%20Report%20Form%20AED.2.docx

8. Recordkeeping, Reporting & Monitoring

Per DOH policy 07-04 Cornell University shall notify the EHC within 24 hours of any AED use

Per agreement with CNY Regional EMS council report any use of an AED with 48 hours proper form can be located at

If the AED used was a SUNY Cardiac Science unit you must also notify SUNY within 48 hours
utilizing the following form:
https://sharepoint.rmps.cornell.edu:8445/ehs/HSE%20Documents/AED%20Incident%20Report%20Form%20AED.2.docx

Maintain current collaborative agreement with CNY EMS, updating within 5 business days if the EHP changes

Maintain records in accordance with University Policy

9. Appendix

- (PAD Manager) The Program Manager has overall responsibility for the program
- (PAD Coordinator) The person/s delegated by the PAD Manager to assist with the day to day operations of the PAD program
  The PAD Coordinator shall be a member of the Emergency Services team as designated by the PAD Manager
