From the Department of Environmental Health and Safety (EHS)

Thank you for taking the time to read this year's annual fire safety report. This report, prepared annually by the Department of Environmental Health and Safety, is designed to provide you with important information about fire safety on campus.

You may obtain a copy of this report and the NYS Kerry Rose Act Notification Table by contacting the University Fire Marshal's Office at (607)255-8200 or by accessing the web site:

[Annual Fire Safety Report and Logs](#)

You may also view the on-campus student housing fire logs at that web site.

The Department of Environmental Health and Safety is charged with promoting a safe learning, working, and living environment for the University. Our health and safety programs provide services and guidance to campus students, faculty, staff, and visitors. Environmental Health and Safety emergency services personnel are on campus 24 hours a day to respond to safety concerns and emergency situations.

Our department provides a wide array of safety related services including programs in:

- Fire Protection, Emergency Services and Emergency Management
 - Fire Protection Systems and Equipment
 - Emergency Management
 - Emergency Services
 - University Fire Marshal
 - Events Management
 - Fire Safety Education & Training
- Research and Laboratory Safety
 - Chemical Safety
 - Biological Safety
 - Radiation Safety
 - Hazardous Waste
- Environmental Compliance, Occupational Health, Safety and Injury Prevention
 - Water Programs
 - Bulk Storage
 - Air Programs
 - Occupational Health, Safety and Injury Prevention

Please visit our web site or contact our department for more information.

Annual Security Report

You can obtain a copy of Cornell University Annual Security Report by contacting the Chief of Cornell Police (607)255-8945 or by accessing the following web site:

<https://www.cupolice.cornell.edu/campus-watch/annual-security-report/>

Scope

This Annual Fire Safety Report is for the Cornell University campus located in Ithaca, NY.

Definitions

- Carbon Monoxide Detection – carbon monoxide detectors that are connected to a Fire Alarm System defined above, does not cause a building-wide evacuation alarm when activated but sends a distinct and separate signal to the Cornell 911 Center.
- Fire – any instance of open flame or other burning in a place not intended to contain the burning or in an uncontrolled manner.
- Fire Alarm System – a central, building-wide alarm system that provides fire detection through the use of smoke and heat detectors, monitors fire suppression systems, sounds building-wide evacuation alarms, and is monitored by the Cornell 911 Center.
- Fire Sprinkler System – water based automatic fire suppression system.
 - Full – the fire sprinkler system provides protection for the entire structure
 - Partial – the fire sprinkler system provides protection for only part of the structure.
- Local CO Detector – a device that contains a carbon monoxide detector and an integrated audible alarm that is a different in sound from a local smoke alarm. When activated the local co detector alarm sounds a distinct and separate audible alarm but does not activate the facility fire alarm system and or send an alarm signal to the Cornell 911 Center.
- Local Smoke Alarm – a device that contains a smoke detector and an integrated audible alarm. Prior to 2014, when activated, the local smoke alarm sounded an audible alarm but did not activate the facility fire alarm system and or send an alarm signal to the Cornell 911 Center. Beginning in 2014, renovations of fire alarm systems required that the local smoke alarm(s) sound an audible alarm and transmit a Supervisory Condition to the Cornell 911 Center.
- On-campus student housing facilities – student housing facilities that are owned or controlled by Cornell University, or are located on property that is owned or controlled by Cornell University, and is within the reasonably contiguous geographic area that makes up the Cornell University Campus in Ithaca, NY.
- Smoke Detection – smoke detectors that are connected to a Fire Alarm System, as defined above, and cause a building-wide evacuation alarm when activated.

Cornell University Campus Life and Residential Programs Fire Safety Policies

The following fire safety related policies for Cornell University on-campus student housing are taken from the current Campus Life Housing Contract Terms and Conditions and the current Residential Program House Rules. Occupants receive a copy of the House Rules and are required to sign an acknowledgement of the rules during check in.

Campus Life and Residential Programs on-campus student housing facilities are the undergraduate student housing facilities, cooperatives, small living units, and married/graduate student housing facilities listed in the Facility Fire Safety Equipment tables starting on page 17 of this document.

To view the specific documents applicable to each type of Campus Life housing facility, please access the Campus Life Housing web site at:

[Living @ Cornell](#)

then use the links under the “Live” drop down menu to navigate through the site.

Cooking and Appliances

- Kitchenettes are provided in each residence hall for cooking. Residents are expected to abide by the following rules regarding cooking:
 - Cooking is prohibited in hallways, bathrooms, and lounges.
 - Student may not leave stovetop cooking unattended.
 - Appliances with immersion coils, water heaters without automatic shut offs, and exposed coils (e.g., space heaters) are prohibited in the residence halls unless provided by SCL Facilities.
 - Appliances with self-contained, thermostatically controlled heating elements with automatic shut off may be used in student rooms.
 - Appliances with open heating elements (toasters and toaster oven) may be used in kitchenettes only.
 - Stand-alone microwaves are prohibited in individual rooms; students may use the microwave in their building's or apartment shared kitchen.
 - A “microfridge” (combined microwave and refrigerator) is permitted, as long as it does not draw more than 7.3 amps [700 watts] to start and 1.5 amps while running. Due to wattage requirements, microfridges must be those rented from the University-approved vendor, or another with the above amperage and wattage parameters. Refrigerators may be purchased but cannot exceed the above specifications.
 - Use only electrical equipment identified with the Underwriter's Laboratories (UL) label.

Fire Safety

- Tampering with fire extinguishers, smoke detectors, sprinklers, fire and emergency doors, and other fire safety equipment, or falsely reporting a fire verbally or by pulling the fire alarm is a threat to safety and will result in an immediate referral to the Judicial Administrator.
- Fire extinguishers are located on each floor of each building/residence hall and are to be used only by trained personnel. Residents should familiarize themselves with the locations of fire alarm manual stations and marked EXITS located throughout the buildings.
- The University conducts periodic evacuation drills to practice education and safe exiting from buildings. You must exit from the building when the fire alarm is activated, and cannot re-enter the building until given permission by University personnel. Please note that evacuation plans are posted at elevators, stairs and exit points throughout the buildings. These plans will indicate means to exit the building safely. All persons should be familiar with the procedures for evacuating a building.
- University safety plans can be reviewed by visiting:
 - <http://sp.ehs.cornell.edu/fps/fire-safety-plans>
- Manual pull stations are located at exit points from each floor and the building exterior doors. In the event of a fire emergency, please activate the station to sound the fire alarm. This will automatically contact emergency responders. Falsely pulling the pull station will result in a referral to the Judicial Administrator.
- Smoke detectors are located throughout student rooms, corridors, and common areas. Do not block, cover, or tamper with any detector. Tampering with smoke detectors will result in a referral to the Judicial Administrator.
- Objects may not be 18 inches or closer to the ceiling or any fire safety device.
- In the event of a fire or other emergency residents must exit the building following EXIT signs that are located throughout the building. Failure to follow evacuation procedures during an alarm will result in immediate referral to the Judicial Administrator.
- Student room doors cannot be propped open if they are designed to automatically shut.
- Storing flammable liquids (including instant light charcoal) and gases are not permitted in residential communities.
- Use of open flame is prohibited.
- Candles (wick or wickless) and incense are not allowed.
 - Groups of students may request approval to burn candles for religious purposes. To obtain approval, individuals should abide by the following procedure:
 - Obtain and complete a “Candle Open Flame Permit” from the Residence Hall Director (RHD)/House Associate Dean (HAD) at least two weeks in advance of when the event is to take place. The permit must include the date(s) and time(s) of use with the following stipulations:
 - the RHD/HAD will be present during the use of live candles
 - the event occurs in a common area and not an individual student room

- a fire extinguisher must be within the immediate vicinity of the use of live candles
 - Approved open flame candles must also be placed in a stable container, preferably a glass-globe type of holder.
- Students may not leave personal items in hallways or stairwells.
- Extension cords and multi-plug adapters are prohibited. An outlet strip with a breaker switch that is identified with an Underwriter's Laboratories label or listing (UL) is allowed.
- Floor lamps must have the required wattage light bulbs and cannot exceed what is stated on the lamp's UL label. The UL and wattage labels are commonly found on the shade or near the outlet for the light bulb.
- The University is subject to fire and safety inspections by various agencies. If a fine is incurred as a result of your failure to comply with the terms of your Housing Contract or with any request from University staff, you will be responsible for the amount of the fine.
- Any material that is in violation of the House Rules and/or Code of Conduct is subject to confiscation during fire and safety inspections. Any material taken will be identified by room, kept by the RHD/HAD, and will be available for collection on designated dates before university breaks. If items are not collected by the end of the semester, they will be disposed.
- Please note that the Fire Safety policies are subject to compliance changes and updates based on local and state regulated standards. Advance notice of changes/updates will be provided, whenever possible.

Fireworks

- Fireworks are illegal under New York State law. Any use of fireworks will result in immediate referral to the Judicial Administrator.
- The storage or use of fireworks of any kind are prohibited in residential communities.

Hover Boards

- Due to fire risks associated with hover boards, they are not allowed for fire safety reasons. This ban is effective January 2016 in all university-owned housing, including residence halls, apartments, co-ops, and Greek housing.

Decorating Rooms

- No more than one 8 ½" by 11" sheet of paper, per resident, is allowed on the outside of a room door.
- Decorations including natural evergreen trees, wreaths, or boughs are prohibited. Artificial decorations may be used and must be clearly marked as being made from a slow burning or a non-combustible material.

- Decorative strands of lights are permitted with an Underwriter's Laboratories label or listing (UL).
- Alterations (including but not limited to painting) to a room/apartment or to any University property within a room/apartment or common area is prohibited.
- Hanging or extending anything outside the windows is prohibited.
- Floor lamps with halogen bulbs are prohibited.
- "Octopus/spider" lamps are prohibited.
- Internal cables may not be spliced and run to individual rooms.
- Maintenance in student rooms and common areas may only be completed by authorized staff.
- Objects may not block the windows.
- Hanging or posting anything on ceilings is prohibited.
- Hanging anything from sprinkler pipes or any part of the fire sprinkler system is prohibited.
- Covering smoke detectors and/or sprinkler heads is a life safety issue and is prohibited.
- Tapestries, cloths/sheets, plastic signs, and flags may not be hung in student rooms.
- No more than ten percent of the wall can be covered by decorations in compliance with fire code.
- Windows in all student rooms come already equipped with drapes, shades, or blinds. Students may not hang their own window treatments in their rooms, unless material is fire rated and labeled as such. Certification must be on file with the SAS Facilities Office.

Motor Vehicles

- Storing or parking motorized vehicles in residential halls is not permitted

Health and Safety

- Egress access must be safe and passable at all times, including corridors, stairwells, lounges, other common space and living space. In student rooms, state and city regulations require a clear path from the bed to the door as well as a minimum of 36 inches between the door and any other item in the room.
- Dangerous and/or hazardous materials are prohibited in residential communities.

Smoking

- Smoking is prohibited in all University undergraduate residential communities. This includes student rooms, offices, lounges, entryways, hallways, kitchens, bedrooms, elevators, and stairwells.
- Persons who smoke outside the residence halls must do so 25 feet from the building or any extending wall, awning, or other building feature, or where it is otherwise posted.
- The smoking and storing of hookahs in rooms is prohibited.

Fire Safety Policies from the Housing Contract Terms and Conditions

- You and your guests must immediately evacuate the building and follow all residence staff directions if a fire alarm sounds. You are responsible for knowing where the fire alarm boxes are located in your building. Fire extinguishers are for use by trained personnel only.
- The University is subject to fire and safety inspections by various agencies. If a fine is incurred as a result of your failure to comply with the terms of your Housing Contract or with any request from residence staff or other University staff, you will be responsible for the amount of the fine.
- You must not store explosive or flammable substances in any portion of University housing. The use of candles, incense, and any other open flames in student rooms is prohibited. Candles may be used for religious purposes or approved special events only if they are placed in a stable container, preferably a glass-globe type of holder, and used in a common area with prior approval from a professional residence hall/house staff member. A residence hall/house staff member must be present throughout the approved event.
- You may not hang anything from sprinkler pipes or any part of the fire sprinkler system.
- You must not activate false alarms, interfere with the proper functioning of the fire-alarm system, or tamper with or remove smoke detectors, fire hoses, extinguishers, or fire-fighting equipment. Violators may be subject to disciplinary action under the Campus Code of Conduct or state or local law. Activating a false alarm is a Class A misdemeanor and can result in a one-year jail term and/or a \$1000 fine for the first offense.

Cornell University Fraternity and Sorority On-Campus Student Housing Fire Safety Policies

Cornell University Fraternity and Sorority on-campus student housing are the “Fraternity & Sorority On-Campus Student Housing” facilities listed in the Facility Fire Safety Equipment table on page 20 of this document. Cornell University owns these facilities, but Cornell does not supervise or control the fraternity or sorority activities.

To be allowed to operate, all fraternities and sororities at Cornell must each year sign a Fraternity and Sorority Operating and Management Agreement which obligates the fraternity or sorority to comply with all University standards, policies, rules and regulations, including the University Recognition Policy for Fraternities and Sororities, and all applicable Federal, New York State, and local ordinances and regulations including those related to fire safety.

The following fire safety related policies for Cornell University on-campus fraternity and sorority student housing are taken from the current Cornell University-Office of Fraternity and Sorority Affairs Fraternity / Sorority Housing Contract.

Refrigerators and Other Electrical Appliances

- Halogen lamps and spider lamps are not permitted.
- Only vibrating-compressor-type refrigerators drawing no more than three amps to start and one and half amps while running are permitted in bedrooms. During any official University recess in which the Fraternity / Sorority Residence will be closed for more than four days, you must remove all food from your refrigerator, disconnect it, and leave the door open. All other electrical devices must be turned off during any official recess.
- You may use electrical devices such as radios, record players, tape recorders, typewriters, hair dryers, razors, and clocks provided they are plugged into outlets in your room and do not exceed the amperage limits of the circuits in the room.
- Constructing computer connections between rooms is prohibited as is running an electrical cord from your room to a corridor outlet.

Food Preparation

- Fire-safety requirements prohibit cooking anywhere in the Fraternity / Sorority Residence except in designated kitchens. Coffeepots, popcorn poppers, and automatic toasters that include self-contained thermostatically controlled heating elements are the only food-preparation appliances that may be used in your room. Any electrical cooking appliance not thermostatically controlled is prohibited anywhere in the Fraternity / Sorority Residence and will be confiscated.

Fire Safety

- You and your guests must immediately evacuate the building if a fire alarm sounds. You are responsible for knowing where the fire alarm boxes are located in your building. Fire extinguishers are for use by trained personnel only.
- The University is subject to fire and safety inspections by various agencies. If a fine is incurred as a result of your failure to comply with the terms of your Housing Contract or with any request from University staff, you will be responsible for the amount of the fine.
- You must not store explosive or flammable substances in any portion of University housing. The use of candles, incense, and any other open flames in student rooms is prohibited.
- You may not hang anything from sprinkler pipes or any part of the fire sprinkler system.
- You must not activate false alarms, interfere with the proper functioning of the fire-alarm system, or tamper with or remove smoke detectors, fire hoses, extinguishers, or fire-fighting equipment. Violators may be subject to disciplinary action under the Campus Code of Conduct or state or local law. Activating a false alarm is a Class A misdemeanor and can result in a one-year jail term and/or a \$1000 fine for the first offense.

Fire Safety Education and Training

Campus Life and Residential Programs Facilities

Resident Advisors receive annual fire safety training. This training includes such topics as:

- Principles of fire prevention
- Principles of fire safety
- Facility fire protection equipment and how to prevent false alarms
- How to report a fire
- Evacuation procedures and actions to take in the event of an emergency

The training program utilizes elements from the People's Burn Foundation College Fire Survival program. [Igot2kno](#)

Resident Advisors hold floor meetings with residents at the beginning of the school year and discuss fire safety. Topics discussed include: general fire safety, evacuation policies and procedures, and house rules related to fire safety

Fraternity and Sorority Facilities

House Managers of each on-campus fraternity or sorority student housing facility are required to attend annual house manager training that includes a session on fire safety.

On-Line Training Programs

Environmental Health and Safety also offers various health and safety related training, including fire safety training, through the Cornell's on-line training system "CU Learn." Please visit the [CU Learn](#) web site to view and enroll in any of the Environmental Health and Safety courses listed in the course catalog.

On-Site Training

Upon request, the University Fire Marshal's Office conducts on site Fire Safety Education and Training Classes. Contact Environmental Health and Safety by e-mail at [askEHS](#) or by calling (607) 255-8200.

Environmental Health and Safety continually evaluates and updates the content of campus Fire Safety Education programs to ensure they reflect the latest information and trends.

Fire Safety Inspections

The Cornell University campus spans a number of different municipalities and jurisdictions. The University Fire Marshal works with these different entities to coordinate fire and building code inspections and to promote code compliance across campus.

The following inspections are conducted in Cornell on-campus student housing:

- New York State Office of Fire Prevention & Control – Annual fire code inspection in all Cornell facilities.
- Ithaca Building Department – Annual housing inspection in all Cornell student housing facilities in the City of Ithaca.
- Ithaca Fire Department – Annual fire code inspection in areas of public assembly and adjacent spaces (some of these public assembly spaces are located in housing facilities) in the City of Ithaca.

Fire Safety Improvements

Cornell University operates continuous programs to conduct testing and inspections of fire protection equipment as required by the New York Uniform Code and other standards. Repairs and maintenance are completed as needed by trained personnel. Improvements to fire safety equipment and procedures are undertaken as needed.

Emergency Procedures

Reporting Fires and Emergencies

Report on-campus fires and emergencies to the Cornell 911 Center, operated by Cornell Police, by one of these methods:

- call 911 from any campus phone
- call 607-255-1111 from a cellular or off-campus phone
- use a Blue Light Telephone or other emergency telephone
- activate the building fire alarm using a manual fire alarm pull-station.

The Cornell 911 center will notify the on-duty Environmental Health and Safety Emergency Services Specialist and the Tompkins County 911 Center.

All fires, including those that have been extinguished, must be reported to Cornell Police.

Emergency Procedures

Cornell has published an Emergency Action Guide to help members of the Cornell Community properly respond to emergencies on campus. The current version of the guide can be found at the Cornell University Emergency web page:

<https://emergency.cornell.edu/>

The electronic version of the guide is located in the sidebar of each web page and includes a link to a printable version of the guide.

Evacuation Procedures

All persons are required to evacuate from and exit the building any time: the fire or evacuation alarm sounds; an evacuation announcement is made; or a university official orders you to evacuate.

Evacuation routes are posted in all residential buildings. Occupants should review them in advance, identify all the available exits, and know at least two ways out.

When evacuating, remember to:

- Close any open windows in your room
- Take jackets or clothing needed for protection from the weather
- Feel the top of your room door for heat before opening it
- Stay low and open the door slowly checking for signs of smoke or fire in the corridor

- Close your room door behind you as you leave
- Proceed quickly to the nearest exit
- Move away from the building and to your floor's meeting location
- If you have information about the emergency then report it to emergency responders
- If you are unable to exit the building due to a disability or fire conditions, take refuge in a safe location and call 911. If possible, signal out a window to emergency responders.

Reporting Malfunctioning Local Smoke Alarms

Report malfunctioning smoke alarms to the Cornell 911 Center by calling (607) 255-1111 at any time, day or night. Environmental Health and Safety Emergency Services personnel are on duty 24 hours a day and will respond to rectify the problem.

Never cover, remove, or tamper with smoke alarms or other fire protection equipment.

Cornell University Fire Safety Plan

The current Cornell University Fire Safety Plan is shown on the next page. This fire safety plan is applicable to all campus facilities, including on-campus student housing facilities, and is posted throughout campus buildings.

Multi-lingual copies of the plan are available in the Fire Safety Plan section of the Environmental Health and Safety web site:

[Fire Safety Plans](#)

Cornell University Fire Safety Plan

IN CASE OF EMERGENCY

Cornell University Fire Safety Plan (March 2012)

CALL
911

EMERGENCY

Fire Emergency

1. REPORT

- Alert others in the immediate area and evacuate the room.
- If present, activate a fire alarm pull box on your way out of the building.
 - The fire department is automatically notified.
- CALL 911 from a safe location
 - Report the location and size of the fire

EVACUATION ALARM SIGNALS

may include

HORNS / STROBES / VOICE

2. CONFINE THE FIRE BY CLOSING THE DOOR TO THE ROOM.

3. EXIT VIA THE NEAREST SAFE ESCAPE ROUTE

- Feel Door Knob and Upper Part of the Door - do not open the door if either are hot.
- Open door slowly if it is cool, be ready to close it if smoke or heat is present.
- Walk, do not run to the exits. Always use stairwells to exit the building, do not use elevators.

4. MOVE TO YOUR EMERGENCY MEETING SITE

- Move away from the building
 - If you are unable to leave the building due to a physical disability:
 - Go to the nearest protected area where there are no hazards.
 - Use a telephone to call Cornell Police at 911 from any campus phone (or 607-255-1111 from cell phone), or use other means to advise them of your situation.
 - Give your name, your location and room number.
 - If unable to call, signal out the window to on-site emergency responders.
 - One person may remain with you if they wish to assist you.
- Report any missing or trapped people to the emergency responders.

Medical Emergency

1. PROTECT VICTIM FROM FURTHER INJURY

- Remove any persistent threat to the victim. Do not move the victim unnecessarily.

2. CALL 911 TO OBTAIN EMERGENCY MEDICAL CARE

- Report the location of the person and the nature and extent of injuries.
- CALL from a safe location

3. PROVIDE FIRST AID IF YOU HAVE APPROPRIATE TRAINING

Police Emergency

1. PROTECT YOURSELF FROM HARM

- Attempt to remove yourself from any danger.

2. CALL 911 TO OBTAIN POLICE ASSISTANCE

- If possible, call from a safe location.

3. PROVIDE THE FOLLOWING INFORMATION TO THE POLICE:

- Location of Crime • Nature of crime & specifics • Any injuries
- Description of suspects • Direction of travel of suspects • Description of vehicles involved

4. DO NOT PURSUE OR ATTEMPT TO DETAIN SUSPECTS

Other Emergencies

1. EVACUATE IF NEEDED AND CALL 911 TO REPORT OTHER EMERGENCIES

For more information on Fire Prevention: www.ehs.cornell.edu
