

# KERRY ROSE ACT

## NOTIFICATION TABLE

This table has been prepared by the Department of Environmental Health and Safety to provide information in compliance with the Kerry Rose Fire Sprinkler Notification Act.

### Scope

This table documents the fire safety systems located in Cornell University owned facilities in New York State where Cornell students may reside. Facilities are located in Ithaca, NY unless otherwise noted.

### Definitions

- Fire Alarm System – a central, building-wide alarm system that provides fire detection through the use of smoke and heat detectors, monitors fire suppression systems, sounds building-wide evacuation alarms, and is monitored by the Cornell 911 Center.
- Fire Sprinkler System – water based automatic fire suppression system.
  - Full – the fire sprinkler system provides protection for the entire structure
  - Partial – the fire sprinkler system provides protection for only part of the structure.
- Local Smoke Alarm – a device that contains a smoke detector and an integrated audible alarm. When activated the local smoke alarm sounds an audible alarm but does not activate the facility fire alarm system and or send an alarm signal to the Cornell 911 Center.
- Smoke Detection – smoke detectors that are connected to a Fire Alarm System defined above and cause a building-wide evacuation alarm when activated.
