DOT compliance deadline for Dry Ice and Infectious Substance Labels

Effective October 1, 2014 you must use the NEW labels!

Class 9 label – In order to bring this label more in-line with international standards the class 9 label has been revised by removing the horizontal line running across the label at its midpoint.

Class 6.2 label – The reference to the Centers for Disease Control (CDC) is no longer required on this label and the DOT has removed all unnecessary text.

Failure to use the required new labels will result in your shipment being rejected and returned. The FAA (Federal Aviation Administration) routinely inspects the University’s DOT program for shipping hazardous materials and minor violations can carry a penalty of $1,000 - $5,500.

Labels can be ordered at:
Grainger, Inc. (e-shop)
Labelmaster (labelmaster.com) 4/2014
